OVERVIEW

L Line

18'-25' pontoon boats loaded with standards plus vast style and option choices.

FEATURES & OPTIONS

The Art of Performance

Our engineers have pioneered the design of performance pontoons, creating boats more capable with greater confidence and handling than many traditional fiberglass boats. The L model offers performance options and power packages up to 300 HP.

The Dark Side of Beauty

Standout on the water with our premium blackout finish package with dark-finish rails, Bimini frame, ladder, deck rail and bumper trim. To complete the look, we've even carried the blackout theme below the deck skirting.

Surround Yourself with Control

A one-piece composite glass Expedition Plus console surrounds you with complete control thanks to an intuitive layout and easy to operate helm. Customize further with your choice of colors, smoked windscreen and optional GPS, sonar and depth finder equipment.

Head to Toe Detail

Computer assisted design allows our engineers to incorporate details like our integrated recessed toe-kick which makes it easier to move about the deck, gain closer access to the rail and avoid shoe scuffs for a long-lasting showroom finish.
